

## Who we are

Founded in 1949, the Scientific Association for Infocommunications (formerly known as Scientific Society for Telecommunications) is a voluntary and autonomous professional society of engineers and economists, researchers and businessmen, managers and educational, regulatory and other professionals working in the fields of telecommunications, broadcasting, electronics, information and media technologies in Hungary.

Besides its more than 1200 individual members, the Scientific Association for Infocommunications (in Hungarian: HÍRKÖZLÉSI ÉS INFORMATIKAI TUDOMÁNYOS EGYESÜLET, HTE) has more than 50 corporate members as well. Among them there are large companies and small-and-medium enterprises with industrial, trade, service-providing, research and development activities, as well as educational institutions and research centers.

HTE is a Sister Society of the Institute of Electrical and Electronics Engineers, Inc. (IEEE) and the IEEE Communications Society. HTE is a corporate member of the International Telecommunications Society (ITS).

## What we do

HTE has a broad range of activities that aim to promote the convergence of information and communication technologies and the deployment of synergic applications and services, to broaden the knowledge and skills of our members, to facilitate the exchange of ideas and experiences, as well as to integrate and harmonize the professional opinions and standpoints derived from various group interests and market dynamics.

To achieve these goals, we...

- contribute to the analysis of technical, economic, and social questions related to our field of competence, and forward the synthesized opinion of our experts to scientific, legislative, industrial and educational organizations and institutions;
- follow the national and international trends and results related to our field of competence, foster the professional and business relations between foreign and Hungarian companies and institutes;

- organize an extensive range of lectures, seminars, debates, conferences, exhibitions, company presentations, and club events in order to transfer and deploy scientific, technical and economic knowledge and skills;
- promote professional secondary and higher education and take active part in the development of professional education, teaching and training;
- establish and maintain relations with other domestic and foreign fellow associations, IEEE sister societies;
- award prizes for outstanding scientific, educational, managerial, commercial and/or societal activities and achievements in the fields of infocommunication.

## HTE structure

### Managing and supervising bodies:

General Assembly, Presidency, Executive Committee, Supervisory Committee, Ethics Committee

### Permanent advisory bodies:

Economics Committee, Awards Committee, International Affairs, Scientific Committee, Senior Committee, Juniors Committee, Council of Corporate members

### Professional sections:

Cable Television, Computer Engineering, Digital Radio, Documentation Technology, e-Hungary, Media Informatics, Media Receiving Technology, Micro and Nanoelectronics, Power Industry Communications, Project Management, Radiocommunications, Senior Club, Telecommunications, Intelligent Healthcare Systems, Transport Communications

Péter Nagy (HTE managing director) ICC2013 Finance Chair,  
John Vig (IEEE Past President, USA) ICC2013 Publicity Chair,  
Lajos Hanzo (Professor, University of Southampton) ICC2013 Executive Chair  
and Rolland Vida (HTE International Affairs) ICC2013 Operations Chair  
during IEEE Globecom 2009

## Our journals

The **Infocommunications Journal** published by HTE is a quarterly peer-reviewed English language journal that provides a forum for researchers in Hungary and abroad to publish their latest research results of international relevance.

The journal has an International Editorial Board consisting of high standing representatives of the international professional community, including many IEEE and IEEE ComSoc members. Infocommunications Journal has been accepted for indexing by EI/Compendex and INSPEC from 2011.

HTE publishes also a quarterly Hungarian language journal titled **Híradástechnika** with quality tutorial-type articles and permanent columns (e.g. history of telecommunications, book reviews, funding opportunities) to inform the possibly largest technical community about the state-of-the-art and trends in different areas of telecommunications and information technology.

The Editorial Board of Híradástechnika is chaired by Prof. Dr. László Zombory and consists of outstanding professionals representing various technical areas in telecommunications and information technology. Both series are also available in electronic format at [www.infocommunications.hu](http://www.infocommunications.hu) and [www.hiradastechnika.hu](http://www.hiradastechnika.hu), respectively.

The journals are supported by the IEEE Hungary Section, the National Civil Fund (NCA) and the National Cultural Fund (NKA).
